SmartSplit & ExpenseAI — Manual Test Cases

Updated 3 November 2026. Run these on the live site, **https://smarsplit.onrender.com**, to see every feature working with your own eyes. Each test says exactly what to do and what you should see.

How to run these tests

- **Three people, three roles.** Person **A** is Azeem (group admin, and the app's super admin). Person **B** is Chanda. Person **C** is Saba. Each person uses their own laptop or phone and their own account.
- **Wake the site first.** The free server sleeps when nobody uses it. Open the site and wait up to a minute before the first test.
- **For invite tests** use a throwaway address from https://temp-mail.org, so the email can be checked without a real inbox.
- **Mark each test** Pass or Fail in the last column. If a test fails, take a screenshot and send it with the test ID, for example "TC-31 failed".
- Amounts are in whole rupees. Numbers marked "about" change with the day's exchange rate or gold price.

Automatic checks already done

- **323 automated tests** (unit and API tests) pass on every change before it goes live.
- **Browser test run on 3 November 2026** (a copy of the app on a laptop with demo data): results are listed at the end of this document.

1. Account and login

ID	Test	Steps	Expected result	Pass/Fail
TC-01	Create an account	Open the site → Create an account → enter name, email and a password of 8 or more characters → submit	You land on the Dashboard with your name at the top	

ID	Test	Steps	Expected result	Pass/Fail
TC-02	Short password refused	On Create an account, type a 5-character password → submit	Message: “Password must be at least 8 characters”; no account is made	
TC-03	Log out and log in	Log out → Sign in with the same email and password	You are back on the Dashboard	
TC-04	Wrong password	Sign in with the right email and a wrong password	A clear error message; you stay on the sign-in page	
TC-05	Stay signed in	While signed in, refresh the page (F5)	You are still signed in, not sent back to the sign-in page	
TC-06	Forgot password email	Log out → Forgot password → enter your email	Within 1–2 minutes an email from **SmartSplit** arrives (check Spam too)	
TC-07	Reset the password	Open the link in that email → type a new password twice → save → sign in with the new password	“Password updated”, then sign-in works with the new password	
TC-08	Reset link works once	Open the same reset link again	The page says the link is invalid or expired	

2. Personal workspace (my money)

ID	Test	Steps	Expected result	Pass/Fail
TC-09	Add income	Personal → add a transaction: type Income, title “Salary”, Rs 50,000, today	It appears in Recent transactions; Received goes up by Rs 50,000	
TC-10	Add spending	Add Spending: “Groceries”, Rs 8,000, category Food, method JazzCash	It appears in the list; Spent goes up by Rs 8,000	

ID	Test	Steps	Expected result	Pass/Fail
TC-11	Month totals	Look at the top of Personal	Received Rs 50,000, Spent Rs 8,000, Left Rs 42,000 (plus anything you added before)	
TC-12	Budget colours	Set a Food budget of Rs 10,000 → add Food spending until it passes Rs 8,000, then Rs 10,000	The Food bar turns amber at 80% and red at 100%	
TC-13	Edit and delete	Edit “Groceries” to Rs 9,000 → then delete it	The list and the totals change each time	
TC-14	Recurring bill	Add “Rent” Rs 15,000 and turn on Recurring, monthly	It is saved as recurring; the app adds the next month's copy by itself when that date comes	
TC-15	Payment methods	Open the method dropdown	Cash, Bank Transfer, Card, JazzCash, Easypaisa and Raast are all there	
TC-16	Dashboard	Open the Dashboard	It shows this month's spending, money owed across groups, savings found and recent activity	

3. Goals and zakat

ID	Test	Steps	Expected result	Pass/Fail
TC-17	Create a goal	Goals → New goal: “New laptop”, target Rs 120,000, a date 6 months away	The goal card shows 0% and how much to save each month	
TC-18	Deposit	Add a Deposit of Rs 25,000	The card shows about 21% and an On track or Behind badge	
TC-19	Withdraw too much	Try a Withdrawal of Rs 30,000	It is refused; a goal never goes below zero	

ID	Test	Steps	Expected result	Pass/Fail
TC-20	Zakat above the nisab	Goals → Zakat calculator → Cash 150,000, Bank 400,000, nothing owed → Calculate zakat	Your zakatable wealth Rs 550,000 (plus your goals and group balances); Zakat due = that ÷ 40, rounded up (Rs 13,750 for exactly 550,000)	
TC-21	Zakat below the nisab	Clear the form → Cash 50,000 only → Calculate zakat	“Your wealth is below the nisab, so no zakat is due this year.”	
TC-22	Record zakat as paid	From TC-20 press Record as paid → confirm	“Recorded in Personal”; a “Zakat 2026” money-out entry is added to Personal	

4. Groups and joining

ID	Test	Steps	Expected result	Pass/Fail
TC-23	Create a group	**A:** Groups → New group: “Murree Trip”, type Trip, Trip currency PKR → under Invite by email add **B**’s and **C**’s account emails → create	The group opens; B and C are members straight away and get a notification	
TC-24	Invite a new person by email	**A:** Members tab → invite a temp-mail.org address	An invite email from SmartSplit arrives at temp-mail within 1–2 minutes; Copy and WhatsApp buttons are shown too	
TC-25	Join from the invite email	Open the email’s Join the group link → Create an account with that same address	After sign-up you land inside Murree Trip	

ID	Test	Steps	Expected result	Pass/Fail
TC-26	Ask to join with the share link	**A:** copy the group's share link → send it to someone not in the group → they open it and press Ask to join	They see "Waiting for an admin to approve you"; **A** gets a "asked to join" email	
TC-27	Approve the request	**A:** Members tab → Approve	The person becomes a member and can open the group	
TC-28	Members only	**C:** copy the group's web address → a person who is not a member opens it while signed in	They cannot see the group's bills (not found / no access)	

5. Group expenses and splits

All in the Murree Trip group from TC-23, with A, B and C as members.

ID	Test	Steps	Expected result	Pass/Fail
TC-29	Equal split with a leftover rupee	**A:** Add expense "Snacks", Rs 100, paid by A, split Equally between A, B and C	Shares are A Rs 34, B Rs 33, C Rs 33 (the extra rupee goes to the payer)	
TC-30	Exact amounts, short	Add expense Rs 3,000, split by Exact amounts: A 1,500, B 1,000, C 450	A message says you are Rs 50 short and Save stays off; change C to 500 and it saves	
TC-31	Percentages must make 100%	Add expense Rs 3,000 by Percentage: 50 / 25 / 15	"Percentages add up to 90%, not 100%" and Save stays off; change 15 to 25 and it saves as 1,500 / 750 / 750	
TC-32	Line items	Add expense by Line items: Pizza Rs 1,500 for A, B, C and Drink Rs 300 for A only	A pays a share of the pizza plus the whole drink; the total is Rs 1,800	

ID	Test	Steps	Expected result	Pass/Fail
TC-33	Two payers	Add “Hotel” Rs 9,000 paid by A Rs 6,000 and B Rs 3,000, split Equally	The expense saves; both payers are shown	
TC-34	Trip abroad currency	**A:** New group “Dubai Trip” with Trip currency **AED** → Add expense	The currency box already says AED; typing 412.50 shows about Rs 31,000; the list shows the rupee amount with “AED 412.5” under it	
TC-35	Edit an expense	Open “Snacks” → change it to Rs 160 → Save changes	The shares and the Balances tab update	
TC-36	Delete an expense	Delete “Snacks”	It leaves the list and the balances change back	

6. Balances and settle up

Start a fresh group “Settle Test” with A, B and C, and add two bills: **Hotel** Rs 9,000 paid by A, split Equally; **Dinner** Rs 3,000 paid by B, split Equally.

ID	Test	Steps	Expected result	Pass/Fail
TC-37	Balances add up to zero	Open the Balances tab	A +Rs 5,000 (green), B −Rs 1,000 (red), C −Rs 4,000 (red); together they make zero	
TC-38	Fewest payments	Settle up → run Min-Cash-Flow	2 payments: C pays A Rs 4,000 and B pays A Rs 1,000; a banner shows the transfers saved (4 → 2)	
TC-39	Only an admin records it	**B** (not admin) opens Settle up	B can see the plan but cannot record the settlement	
TC-40	Record the settlement	**A:** Record settlement	The payments are saved and the group shows as being settled	

ID	Test	Steps	Expected result	Pass/Fail
TC-41	Mark paid	**C:** press Mark paid on the Rs 4,000 payment	That payment shows paid and C's balance goes to zero	
TC-42	Nothing to settle	After every payment is marked paid, open Settle up again	The app says there is nothing to settle	

7. Receipt scanning and savings

ID	Test	Steps	Expected result	Pass/Fail
TC-43	Scan a receipt	Scan → drop a clear photo of a shop receipt (or take one on the phone)	Steps "Uploading the image", "Reading the receipt", then a verification window with the photo and editable lines	
TC-44	Fix a line by hand	In the window, change one item's price → save	The corrected line gets a green tick; nothing was saved before you pressed save	
TC-45	Total check	Change a price so the items no longer match the printed total	A warning names both numbers (items total and printed total)	
TC-46	Save to Personal	Choose Save to Personal	One transaction with the receipt total appears in Personal	
TC-47	Savings tip	Scan a receipt with a common item (for example Cooking Oil 3L) at a high price	A savings card says where it was cheaper, for example "save Rs 145"	
TC-48	Use in a group	Scan again → Use in group expense → pick Murree Trip	Add expense opens with the items filled in as Line items; you still choose who shared what	

8. Price book and live store prices

ID	Test	Steps	Expected result	Pass/Fail
TC-49	Price book for everyone	**B:** Scan → open the Price book	About 100 products with prices from several stores, including Alfatah, Grocerapp, Metro, Jalal Sons and Chaseup	
TC-50	Only super admins edit prices	**B** looks for add, import or remove buttons on the Price book	B cannot change prices; **A** (super admin) can	
TC-51	Live store prices run	**A:** Admin page → Live store prices	The latest run says done, with how many prices each of the 5 stores gave	
TC-52	Update now	**A:** press Update now	The button shows Refreshing…; after about 10 minutes a new run appears as done	
TC-53	Admin page is private	**B** opens /admin in the address bar	B is not allowed in; only super admins see it	

9. Reports and notifications

ID	Test	Steps	Expected result	Pass/Fail
TC-54	Personal report	Reports → Personal	Inflow vs outflow for the last six months, the category donut, and Budget vs actual	
TC-55	Downloads	On Reports, download CSV, Excel and PDF	Three files download and open: a spreadsheet, an Excel sheet and a PDF report	
TC-56	Group report	Reports → Group → Murree Trip	Total spent, spending per category, and the Paid vs consumed chart per member	

ID	Test	Steps	Expected result	Pass/Fail
TC-57	Notification bell	**B** adds an expense in Murree Trip	**A** and **C** see a new notification on the bell, for example “Chanda logged Rs 1,000 for …”; B does not get one for their own action	

10. Security and phone screens

ID	Test	Steps	Expected result	Pass/Fail
TC-58	Pages need sign-in	Log out → type /personal in the address bar	You are sent to the sign-in page	
TC-59	Private data stays private	**B** cannot see **A**'s Personal transactions in any page	Each person only ever sees their own money diary	
TC-60	Last admin stays	**A** (the only admin) tries to remove themselves or drop their admin role	The app refuses, because every group must keep an admin	
TC-61	Phone screen	Open the site on a phone, go through Dashboard, Personal, a group, Settle up and Scan	Everything fits the screen; nothing needs sideways scrolling	
TC-62	Wrong links	Open https://smarsplit.onrender.com/join/bad	A clear message that the link is invalid, with a button back to your groups	

Results of the browser test run

A robot browser ran through the app on 3 November 2026, on a copy of the app on a laptop with demo data, so no real accounts were touched. It used both a desktop screen and a phone-sized screen.

Area	What was checked	Result
Password reset	Forgot password sends the email; the link sets a new password; sign-in works with it	Pass
Invites	Creating a group emails only the person without an account; the Members tab invite emails the new address	Pass
Join by share link	Ask to join shows “waiting for an admin”; the admin gets the email and approves	Pass
Join by invite link	A signed-out stranger sees the invite, creates an account and lands inside the group	Pass
Zakat	Rs 1,394,647 of wealth against a silver nisab of Rs 275,415 gives Rs 34,867 due; Record as paid saves “Zakat 2026” as money out	Pass
Receipt scan	Upload → verification window → save; a savings card says “save Rs 145”	Pass
Reports	CSV, Excel and PDF files download	Pass
Price book and Admin	Price book lists 100 products; the Admin page shows the latest live price run as done	Pass
Trip currency	16 currencies offered; a new expense in an AED group starts in AED; AED 412.50 previews as about Rs 31,087; balances and settle up stay in rupees; a PKR group starts in PKR	Pass
Every page	Every page on desktop and phone: no page errors and no sideways scrolling	Pass
Resend invite	Right after an invite, a “sent” mark replaces the resend button for one minute, so nobody gets spammed	Works as designed

On the live site (3 November 2026):

- An invite email sent through Gmail reached an outside inbox.
- The live price refresh read all 5 stores, updated 189 prices, and left no look-alike prices (such as sugar cane offered as sugar).

Note for testers: with the laptop demo data, a new “Zakat 2026” entry sits below demo entries dated later this month, so look further down the Personal list. With your own account on the live site, it appears at the top.
